Profile

Developer interested in web, front-end/back-end development, mobile dev and security. Active contributor in both development and security communities.

Projects

Member, FireShell.SecurityTeam; Feb 2018 - now
Current team champion in biggest Brazil's tournament . Playing CTF championships almost every weekend and gaining a lot of knowledge in security area. I'm one of the finalists selected to play the finals of 2018 in the individual championship. I'm addicted to web, programming and crypto challenges.

Professional Experience

Freelancer, Independent; Sep 2009 ~ now
- Car tracking system using Twisted to track/send commands to cars and Django app with jQuery;
- Apartment hunting system using Django and jQuery;
- Using scrappy to download full websites (videos included) to help on server moving.
- RPC Server to connect Mobile wallets to Phore Blockchain;

Lead Engineer, Channel(H); May 2016 - May 2018
Responsible by managing/hiring the team and hands-on building the platform with a lot of APIs integration and data visualization.

CEO, StreetBarz; Sep 2014 ~ April 2016
Doing all the technical and business work. PhoneGap, native Android (Java), API and website built by Django. (http://streetbarz.com/)

Full-Stack Developer, crowdSPRING; May 2012 ~ July 2015
Working with user conversion, user interface improvement, doing the whole suite of selenium tests and a lot of backend tasks too.

Google Summer of Code Student 2011, Sencha Labs - Google; May 2011 ~ Aug 2011
Created Line and Scatter Charts to Javascript Infovis Toolkit and wrote documentation.

Developer, Smart Nuts; Remote Work - Oct 2010 ~ Jan 2011
Working with Django, xHTML, CSS and jQuery. Use of Subversion in source code management.

Google Code-In Mentor, Google; Sep 2010 ~ Jan 2011
Helped mentoring students to develop MoinMoin code and documentation.

Google Summer of Code Student 2010, MoinMoin - Google; May 2010 ~ Aug 2010
Integrated Jinja2 and wrote documentation to MoinMoin Wiki.

Developer, Soda Virtual; Oct 2009 ~ Apr 2010
Worked with web development using Django, xHTML, CSS and jQuery in front-end and mySql and Postgres in databases. Deploy using Apache2 and FastCGI and Subversion.

Education
